COR COMPLIANCE PROGRAM	PRODUCT FORMULATION SHEET	OSP SECTION: H2.0 B COR
Find this form at www.ccof.org/documents		Page 1 of 1

The CCOF Canadian Organic Regime (COR) Compliance Program is ONLY for operations located in Canada

Operation Name:_____ **Date:**_____

- Use this form for each multi-ingredient product you manufacture. *Private label/marketers who do not process products are not required to complete this form. Livestock feed producers are not required to submit all formulations, only a sample.*
- Visit www.ccof.org/documents or contact CCOF for an **Excel version** of this document, which auto-calculates and can be used for one or more products. Complete one sheet for each product.
- See formulas below headers to guide your calculations.
- For each nonorganic ingredient or processing aid not previously approved by CCOF, submit a COR Nonorganic Processing Material Affidavit or COR Natural Flavor Affidavit.

Product Name:			
Label Brand Name(s):		**Certifier on Label:**	

Ingredient	Quantity (A)	Weight, %, or fluid volume	% Organic Content of Ingredient (B)	Ingredient's Org. Contribution to Product (C) = AxB
Example Ingredient	*20*	*grams*	*95%*	*19 = (20x0.95)*
Total of non salt and water contents **(D)**: **Total column (A)**			Organic Contribution **(G)**: **Total of column (C)**	
Quantity Salt **(E)**:				
Quantity Water **(F)**:			**Total Organic %: Divide G/D**	
Total Ingredient Quantity: **Add up D, E and F**				

Round down to nearest whole number

List processing aids used (e.g. Carbon Dioxide, Sodium Bicarbonate, etc.) including packaging aids if not listed above. *Only ingredients and materials approved by CCOF and appearing on your COR Handler Materials Application (OSP Materials List) may be used.*
