Update on High Nitrogen Liquid Fertilizers

Current as of MAY 24, 2010 (Page 1 of 2)

Visit www.ccof.org/liquidfertilizer.php for the latest listing and more information.

Per the revised notice published by the National Organic Program (NOP) on December 14, 2009, all manufacturers of high nitrogen liquid fertilizers must be inspected and approved by October 1, 2009 in order for organic farmers to continue using their products.

Any liquid fertilizer product with a nitrogen content or claim of 3% or higher that is not listed below as approved may no longer used by CCOF certified operations unless it is listed as approved by OMRI or WSDA. If you wish to use a liquid fertilizer with a nitrogen analysis of 3% or greater that is not listed below as approved or on the OMRI or WSDA lists, you must provide CCOF documentation that the manufacturer has been inspected and approved according to the criteria in the December 14, 2009 policy directive.

The following manufacturers/ products have been inspected and found to be compliant with the December 14, 2009 NOP Notice on High Nitrogen Liquid Fertilizers. These products may be used by CCOF producers provided that they are listed in your Organic System Plan section G5.1.

Manufacturers Approved	Products Approved
