

Operation Name: _____ Date: _____

▶ Complete this form only if you produce or mill products sold as livestock feed.

Finished Product: _____

Brand or Label: _____

A. PRODUCT COMPOSITION

- 1) Attach organic certificates for each organic ingredient listed below. [] Attached
a) Describe your plan for verifying suppliers and handlers are certified by a COR accredited certifier or are certified to COR equivalent standards.

- 2) Complete table below or provide a separate page with all requested information. [] Page Attached

Table with 6 columns: Ingredient (or product), Quantity, Units (lbs, oz.), Vendor (For organic ingredients, name last certified vendor), Organic (Y/N), Certifier (if any), and CCOF Use Only.

- 3) Calculate the percentage of organically produced ingredients

Calculation table: Total Weight or Volume of Organic Ingredients / Total Weight or Volume of Formula (excluding water and salt) x 100 = % Organic Ingredients

Note: All agricultural ingredients in livestock feed labeled "organic" must be organic. Additional additives, vitamins, minerals etc. must be compliant with livestock standards.

B. LIVESTOCK FEED LABELS

[] Not applicable

Packaged livestock feed products must include the statement "Certified organic by CCOF".

- 1) Attach 8.5 x 11" copies of all package labels. [] Attached [] None
2) Product will be labeled: [] 100% Organic [] Organic
3) Labeling shipping or storage containers (non-retail) [] Not applicable
4) List organic products and check labeling features for containers for shipping and storage (boxes, bills of lading, bin tags)

Table with 2 columns: Product(s) and Label features. Label features include checkboxes for 'organic', 'org', 'o', etc.; CCOF seal/name; CCOF International seal; Special handling instructions; Lot number; and Other.
