

Operation Name: _____ Date: _____

Producers must use organically grown seeds, annual seedlings, and planting stock. Untreated, non-organic seeds and planting stock may be used when equivalent organic varieties are not commercially available. Genetically Modified Organisms (GMOs) are not compatible with organic production and are prohibited. Organically grown seedlings must be used unless a temporary variance has been established due to a natural disaster.

Non-organic planting stock for perennial crops must be organically managed for at least one year before it is organic. Both rootstock and graft must be organically grown to be considered organic.

A. SEEDS & PLANTING STOCK

Please check which of the following you use for planting:

- 1) Seeds: [] No seed used
[] Organic seed (if you use inoculants, complete C & D below)
[] Non-organic, untreated seed (complete B & C below)
[] Non-organic, treated or inoculated seed (complete B, C & D below)
2) Annual Seedlings: [] No annual seedlings purchased
[] Certified organic seedlings. List supplier and attach certificate: _____
3) Perennial Stock: [] No perennial stock purchased
[] Organic perennial stock
[] Non-organic perennial stock (complete B & C below)
4) Other Planting Stock: [] No other planting stock used
[] Organic planting stock other than seedlings, such as rhizomes, shoots, tubers, cuttings or roots (including strawberry crowns, raspberry canes, potato eyes, etc.)
[] Non-organic planting stock other than seedlings (complete B & C below)

B. COMMERCIAL AVAILABILITY

[] Not applicable, all my planting materials are organic

- 1) For all non organic seed or planting stock, what qualities and characteristics do you seek?
[] Germination rate [] Drought tolerance [] Bulk quantity
[] Disease resistance [] Greater crop yield [] Other: _____
2) Explain how you determine that organic seed or planting stock is not available for equivalent varieties:
[] Additional documents attached.

- 3) Do you grow crops on contract such that seed or planting stock is supplied by someone else? [] Yes [] No
If yes, you must maintain documentation that demonstrates your buyer has conducted a commercial availability search. What documents do you maintain?
[] Seed search log [] Invoices
[] Letters from seed suppliers [] Organic certificates [] Other: _____

C. GENETIC MODIFICATION

[] Not applicable, all my planting materials are organic

- 1) Which methods do you use to document that inoculants, non-organic seeds or planting stock is not genetically modified?
[] Non-GMO statement from the supplier [] Catalog statement
[] Other: _____

D. SEED TREATMENTS

[] Not applicable, no seed treatments used

- 1) For any seed treatment (pelletized, coated, primed, fungicide, insecticide, inoculated), how do you verify that the treatment uses only allowed materials and is non-GMO?
[] OMRI or WSDA listing [] Material Review Request Form (MRRF) approved by CCOF
2) Please list all seed treatment materials in OSP section G5.1
