

Operation Name: \_\_\_\_\_ Date: \_\_\_\_\_

*If practices and materials included in G6.2 are not effective to control pests in certified facilities, a synthetic material not on the National List may be used, PROVIDED that CCOF approves the material, method of application, and measures taken to prevent contact with organic products.*

**A. DO YOU INTEND TO APPLY SYNTHETIC PESTICIDES NOT ON THE NATIONAL LIST IN OR AROUND FACILITIES WHERE ORGANIC PRODUCTS ARE STORED OR HANDLED?**

- No, not applicable
- Yes, complete 1-5 below.

Facility name: \_\_\_\_\_

1) For each synthetic pesticide to be used, justify why you must use it instead of preventative measures and pest control materials on the National List (you may attach another page if necessary):

---

---

---

2) What is the method of application:  Crack and crevice spray  Fogging  Fumigation

Other (describe): \_\_\_\_\_

3) List material(s) that will be used (MSDS or label must be available at inspection):

Brand Name (ex: Bait from ABC Co.)	Material (ex: rodenticide)	Target pest	Location used?

4) How do you prevent the pesticides listed above from contacting organic products, ingredients, or packaging materials?

- Remove product from areas to be treated
- Wash and rinse all food contact surfaces after treatment
- Bait contained in secured stations
- Seal containers of organic products or packaging
- Cover equipment used for food handling
- Purge equipment with non-organic product
- Cover organic product (describe):

Other (describe): \_\_\_\_\_

5) How do you verify or record the above described measures were taken (all logs must be available at inspection)?

- Organic product movement log
- Pesticide use log
- Purge log
- Log of covering products or packaging
- Equipment cleaning log
- Other (describe):

---
