Advancing organic agriculture through certification, education, advocacy, and promotion.

Supplier Attestation Document for USDA NOP Products Destined for Canada

The US-Canada Organic Equivalency Arrangement allows any USDA NOP product to be exported to Canada so long as the final exporter receives certifier verification confirming the product meets the terms and critical variances of the arrangement. Suppliers of ingredients to the final processor may self-attest that the ingredient meets the requirements listed below. CCOF has developed a list of crops that are at high risk of being grown with these materials and/or methods. See www.ccof.org/canada for the current list of high-risk crops.

CCOF Certified Operation:

Forward this attestation to your supplier of high-risk ingredients used in products to be sold as organic in Canada. The supplier must complete and sign this form and you must retain a copy for your records.

Ingredient Supplier:

Complete this attestation regarding products provided to the CCOF operation who sent you this document. Any authorized, knowledgeable member of the supply chain for these products may complete this attestation. Sign and return to the CCOF certified operation.

Attestation:

Company Name: _____
