

ORGANIC CERTIFICATION

Service, Support & Integrity

Farmers • Processors • Livestock
Services • Private Labelers • Ingredients • Retailers

CCOF advances organic agriculture for a healthy world. We advocate on behalf of our members for organic policies, support the growth of organic through education and grants, and provide organic certification that is personal and accessible.

We're your partner in the organic movement. We make organic certification seamless by providing:

- Online certification management
- Personal service throughout the United States
- International export services
- Food safety services
- Certification support tools
- An "Organic is Non-GMO & More" seal

CCOF is accredited by the U.S. Department of Agriculture to certify to the National Organic Program standards.

To learn more, visit www.ccof.org »

Advancing organic agriculture through certification, education, advocacy, and promotion.

Expedited Certification Program

- CCOF is dedicated to providing cost-effective and timely service. Due to the complexity of the application review, inspection, and review process, we recommend that certification applications are submitted 12 weeks prior to harvest, projected sales, or other deadlines.
- ▶ If you have a short certification time frame, we provide optional expedited services to meet your needs. Complete this form and return it with your certification application, by email to inbox@ccof.org, or by fax to (831) 423-4528.

Who is this program for?

 Operations that are capable of compliance and wish to finish the certification process as soon as possible (such as impending harvests, market releases, or product launch deadlines). Note that CCOF is currently not accepting expedited requests for the Regenerative Organic Certified® program or reinstatement requests.

How much does expedited service cost?

- New certification applicants and annual inspections (with or without new parcel(s), single facility); includes application fee:
 \$2,525
- Addition of a new facility or equipment to your existing CCOF certification; includes facility/equipment fee: \$2,000
- New acreage at a CCOF-certified farming operation: \$1,300
- Standard additional acreage, inspection and annual certification costs still apply, as applicable. See the <u>CCOF Certification</u>
 <u>Services Program Manual</u> for details. Expedited services may incur higher than average inspection expenses. There are no refunds issued for expedited services.

What will CCOF provide?

- Your application receives top priority processing. Correspondence will be sent as efficiently as possible.
- CCOF will begin securing an inspector immediately. Once your application is reviewed and accepted, your inspection will occur
 as soon as possible based on your schedule and inspector availability.
- The inspection report will be submitted to CCOF within two business days of the inspection.
- CCOF will review the inspection report and identify outstanding issues or grant certification within three business days.

What is expected of me?

- A complete application describing your practices.
- Timely responses to requests for information during the application and inspection review processes.

Can certification be guaranteed by a certain date?

No, certification is dependent upon compliance onsite, the completeness of your application, and the inspector's findings.

What if I don't enroll?

ALLI04, V1, 11/01/2023

• CCOF will process your application as quickly as possible and provide you with high-quality service. Every effort will be made to ensure the process is completed efficiently

MyCCOF Online Certification Management

INNOVATIVE ONLINE CERTIFICATION TOOLS

Managing your certification just got easier.

MyCCOF is the most powerful tool in certification. Monitor your certification and renewals, access key documents, track the inspection and certification process, respond to action items, search for and add approved materials, and much more—all from your computer, tablet, or phone.

MyCCOF is free for CCOF-certified members. Visit **www.ccof.org/myccof** to get started.

Use MyCCOF to:

» Track Action Items

Review outstanding requests from CCOF and respond directly, including a document upload. You can also check on updates you've sent to us.

» Get Your OSP Online

Download your current OSP in real time, whenever and wherever.

» Find What You Need

It's easy to find the documents that maintain your certification.

» Find Materials & Track Your Approved List

View the materials CCOF has approved for your operation. Plus, remove, search, and add new materials as you need them!

» Download Certificates

Find your current certificates and download other CCOF certified operations' certificates.

» Monitor Inspections

Follow the inspection process. Access inspector contact information, find reports, and stay informed.

» Find Service Staff

Find your CCOF service staff and more.

» Pay Bills

Track invoices and pay online!

» Manage Your Public Profile

Publicize your company statement, sales methods, and social media sites through our online organic directory.

» Track Clients & Facilities

Manage several CCOF-certified operations with a single login. Great for consultants and partnerships!

» And More—Continual Improvements

CCOF is dedicated to making certification easy to manage, and we're continually innovating new ways to make MyCCOF even better than before.

Visit www.ccof.org/myccof today to let MyCCOF work for you!

Certification Made Simple

Need to add materials to your OSP? It's easier than ever before.

With MyCCOF Materials Search, you'll never again guess if a material has been reviewed. All CCOF internally-reviewed materials, OMRI Products List® materials, WSDA Brand Name List materials, and CDFA Registered organic input materials can be searched in one place. Plus, you can request OSP changes online day or night, from any device.

» Find What You Need in Our Library

View all CCOF internal material review information, plus OMRI Products List® materials, WSDA Brand Name List materials, and CDFA Registered organic input materials. Know what has and has not been approved in the past and view the status of any reviewed material.

» Easily Add to Your OSP

Request addition of materials to your OSP with the click of a button.

» Save Time

No longer is a phone call necessary to add materials. Take control and add to your OSP whenever, wherever; even with a smartphone!

» Get Notifications

Receive updates as soon as your materials have been reviewed and are ready to use.

Do you have current certificates for CCOF certified operations? Access and track them with confidence.

Buyers and distributors will love the "CCOF Certificate Portal" feature in MyCCOF. This one-of-a-kind service offers tracking and management of CCOF certificates. Access CCOF certificates today!

» Get the Green Light

Easily identify a CCOF-certified operation's standing: green, yellow, or red indicators allow for quick review of certification status.

» Easier Purchasing

Better tracking maintains integrity. Find all your CCOF-certified supplier data in one place. The CCOF Certificate Portal is a way to track the status of a CCOF-certified operation. It is not your Organic System Plan (OSP) and does not reflect your approved suppliers.

» Real-Time Notifications

Receive immediate email notification if any certification status changes.

» Instant Certificates

Track certifications and get your suppliers' certificates as soon as they are created. Conveniently search for certificates by date.

» Faster Inspections

Fly through your inspection with an organized queue of certificates and real-time access to their certification status.

» Organize and Prepare

Never accept an uncertified load again! MyCCOF's "CCOF Certificate Portal" feature will save you time and costly mistakes.

- ► CCOF recommends beginning the application process with sufficient time before certification is required to allow for the necessary inspection and review process. While in some cases certification can be provided in a very short time frame, providing up to twelve weeks is recommended. Expedited services are available.
- ▶ Please keep a copy of all documents submitted to CCOF for your records.
- ► See <u>www.ccof.org/certification/how</u> or contact us with questions. Find all forms at <u>www.ccof.org/documents</u>.
- ► Complete and send the following to apply for certification:
 - CCOF Certification Contract (this 5-page form)
 - Organic System Plan (OSP) forms and attachments
 - o Carefully review the Organic System Plan (OSP) Guides applicable to your operation, and complete all forms indicated:
 - Guide to Grower OSP Forms
 - Guide to Livestock Producer OSP Forms

GUIDE TO HANDLER OSP FORMS

Find all forms at www.ccof.org/documents. Send completed forms to inbox@ccof.org.

Page 1 of 2

Complete all Organic System Plan (OSP) section(s) listed for each activity that matches your current organic activities or plans. Do not complete sections that are not applicable to your operation.

▶ If your activities change in the future, you may need to either complete additional OSP forms or retire OSP forms.

	If you do this (more than one may apply):	Fill out these forms:
1)	Apply for CCOF organic certification.	CCOF Certification Contract
		H5.0 Record Keeping for Handlers
		Organic Fraud Prevention Plan (as needed)
2)	I am a private label brand owner; I contract other independently	Product Application
	certified facilities to produce or label organic product.	H2.0 Organic Products
		• <u>H2.6 Broker Suppliers</u> (if purchasing or storing ingredients that are sent to co-packer)
		Organic product Labels
3)	Act as a broker, trader, wholesaler, distributor, or importer of	H2.5 Brokered Products
•	organic products; I do not process, repack, or relabel.	H2.6 Broker Suppliers
4)	Process, physically handle, or label organic products (for my	Handler Materials Application (OSP Materials List)
,	own brand or for private label brands) at a facility I own or lease.	Product Application (not applicable for wineries)
		H2.0 Organic Products (not applicable for wineries or
		livestock feed processors)
		Organic product Labels
5)	Take physical possession of organic products or ingredients at a	H2.3 Organic Facility – for each location
	facility I own or lease.	H4.0 Organic Practices – for each location
6)	Use nonorganic processing aids, packaging aids, sanitizers, or	Handler Materials Application (OSP Materials List)
	other additives in or on organic products.	 Nonorganic Processing Material Affidavit – for each nonorganic material not previously approved by CCOF, except flavors
		Natural Flavor Affidavit – for each nonorganic flavor
7)	Source ingredients for organic products.	H2.0A Ingredient Suppliers (not applicable for brokers, traders, wholesalers, distributors, importers, livestock handlers, or private label owners who contract other facilities to produce products)
8)	Process multi-ingredient organic products.	H2.0B Product Formulation – for each product
9)	Package products under a brand or private label owned by someone else.	Co-Packer Application – for each brand owner
10)	Source organic products from an uncertified broker, trader, wholesaler, or distributor.	Exempt Handler Affidavit – for each uncertified supplier (CCOF will determine if certification is required)
11)	Use an uncertified storage facility to store organic product in sealed, tamper-evident packaging.	Exempt Handler Affidavit – for each uncertified facility
12)	Provide processing, handling, toll processing, or fee-for-services for organic products that I do not own or take title to.	H2.4 Organic Services (only applicable for products and services not described on H2.0 Organic Products or H2.5 Brokered Products)
13)	Wine – Process or handle wine made from grapes.	V2.0 Organic Winery
-		V2.1 Wine & Label Approval (submit this form & labels once wines are ready to be labeled; wines produced before certification is granted are not eligible to be labeled with organic claims)

¹ Retail = Containers intended to be purchased and carried home by a consumer (retail purchaser). Refer to NOP 205.303-311 for labeling requirements.

² Nonretail = Any container used to ship or store organic products, other than containers used for retail sale of the product. Must identify product as organic and display product lot number, shipping identification, or other unique information that links the container to audit trail documentation.

³ "Made with organic" is only allowed in USA and Mexico. Products labeled "Made with organic" must contain at least 70% organic ingredients. The remaining ingredients must either be agricultural or approved nonorganic materials from the NOP National List.

⁴ Products labeled Organic must contain a minimum of 95% organic ingredients, remaining ingredients must be either organic or approved nonorganic materials from the NOP National List.

⁵ "100% Organic" is only allowed in USA and Mexico. Must be produced with ingredients certified as "100% Organic." Must be produced without nonorganic processing/packaging aids. *NOPB80, V2, 12/30/2023*

An "Audit Trail" or "trace-back" system documents the source (certified supplier), purchase or acquisition, transfer of ownership, physical and financial possession, receipt, handling, production, processing, contractual oversight responsibilities, sale, and transportation of organic products. Records must disclose all activities and transactions in enough detail to be readily understood and audited. Records must show compliance with organic requirements and be kept for at least five (5) years. Records must identify (link back to) the last certified operation in the supply chain and must identify products as organic.

Complete a separate <u>H5.0 Record Keeping</u> form for each process or product when different record keeping systems are used. Facility, product, or process covered by this plan:

C.	Tra	acki	ng Organic Products
1)	Des	scrib ough	e or attach a diagram of how your audit trail trace-back system tracks finished products from the last certified operation, transport, storage, inbound receiving, production or packing to final outbound shipping or invoice.
			cription or diagram attached
	Au		ail systems include the following elements:
	a)		ain of custody and shipping documents – Documents include both internal documents you generate as well as external cuments generated by the last certified organic operation. Common audit trail documents:
		0	Bills of Lading (BOL), purchase orders, invoices, contracts, packing slips, certificate of analyses, product specification sheets, receiving logs, inventory logs, batch records, manifests, shipping and delivery records (field ticket, weigh tickets, scale tickets, receipts, tags), chain of custody, truck and trailer numbers, clean truck affidavits.
	b)	refe	certified operations – Additional audit trail information is required for each shipment that is handled by an uncertified handler er to the Exempt Handler Affidavit (EHA). Sourcing from uncertified handlers requires additional audit trail verification at pection.
		0	Documents from exempt, uncertified handlers must identify (link back to) the last certified operation in the supply chain
		0	Documents generated by the last certified operation proving purchase, delivery, and/or transfer to the uncertified handler must be included for each shipment.
		0	Your receiving procedures must include verification and documentation of the last certified operation.
		0	If product passes through multiple uncertified handlers in sequence, documents must trace through all uncertified handlers back to the last certified handler.
	c)	bee	ports to the US – Importers are required to have additional documentation showing that imported organic products have not an treated upon entry to the USA. Organic imports must be clearly identified and marked as organic on all import documents, luding U.S. Customs and Border Protection entry data.
		0	NOP Import Certificate must be associated with each shipment. The exporter must request an NOP Import Certificate from their certifier prior to shipment. The importer must declare the shipment as organic and enter the NOP Import Certificate number into the CBP ACE database.
		0	Additional documentation for each shipment may include, but are not limited to: import permits, phytosanitary certificates, transaction certificates, NOP Import Certificates, CBP Forms 3461 and 7501, commercial invoices, export packing list, Certificate of Origin, Bill of Lading, Waybills/Air Waybills, AMS Inspection Certificate, Charter Party, Marine Surveyor report (for bulk vessel shipments), APEDA Certificate of Inspection for shipments from India.
	d)	Ex	ports
		0	Shipments from the US to other countries – CCOF-issued export certificates may be reviewed as part of your in/out mass balance during inspection.
		0	Shipments from Mexico to the US – Each shipment must be associated with an NOP Import Certificate. You must request

- an NOP Import Certificate from CCOF prior to shipment. Audit trail documentation showing that exported products were not treated at any point in the product's movement across country borders must be maintained and verified at inspection.
- Attach sample audit trail documents to demonstrate your system.

 Documents attached
 - All audit trail records and documents must identify products and ingredients as "100% Organic", "Organic", "Made with Organic..." or easily understood abbreviation or acronym, e.g. 100% OG, Org, MWO.
 - Documents must identify (link back to) the last certified operation in the supply chain that handled the organic product.
 - Product label must link to documentation via lot number, shipping identification, or other unique identification printed on the 0
 - Documentation must be sufficient to determine the source, transfer of ownership, and transportation of the organic product.

3)	In/out mass balance – Describe the records and system you use to track inventory of ingredients and products. You may attach
	sample documents to illustrate, e.g. monthly log of beginning and ending inventory. Describe any abbreviations or acronyms used in
	your records to indicate that products are organic.

CCOF inspectors will verify that you received sufficient organic products to account for final production, sale, or transportation of organic products.

D. Supply Chain Overview & Fraud Prevention

You must implement monitoring practices and procedures to verify suppliers in the supply chain and organic status of agricultural products received to detect and prevent organic fraud. You must also implement monitoring practices and procedures to verify that your plan is effectively implemented.

A fraud prevention plan must be appropriate to the activities, scope, and complexity of the operation, and should be sufficient to address the verification and anti-fraud needs of the particular operation. This means not all fraud prevention plans will be alike.

For example, a processor that receives many organic ingredients from numerous suppliers should develop a fraud prevention plan that describes practices to detect, prevent, minimize, and mitigate organic fraud risks in lengthy supply chains. Because fraud prevention plans must verify the organic status of suppliers and organic products, they should include a description of how an operation verifies organic status back to the last certified operation in the supply chain.

According to the best practices described by the NOP, an Organic Fraud Prevention Plan may include the elements identified in the

	attach your Organic Fraud Prevention Plan.			
	☐ I completed the CCOF Organic Fraud Prevention Plan worksheet, attached.			
☐ I have updated my existing food safety programs (HACCP/HARPC Plan, Food Safety Plan, Food Defense Plan, Supplier Verification Program, Food Fraud Prevention, or other Prerequisite Programs). Attach a description of where and how ap elements below have been incorporated into your system.				
	☐ I have written my own Organic Fraud Prevention Plan using applicable elements below as a framework. My plan is attached.			
	☐ I am enrolled in OTA's <u>Fraud Prevention Solutions</u> program (optional third-party program), my Fraud Prevention Plan is attached.			
	Supply chain oversight and organic fraud prevention may include:			
Α	Supply chain map.			
В	Practices for verifying the organic status of any product you acquire and/or use.			
С	A process to verify suppliers and minimize supplier risk to organic integrity.			
D	A vulnerability assessment to identify weaknesses in your practices and supply chain.			
Е	Identification of critical control points in the supply chain where organic fraud or loss of organic status are most likely to occur and mitigation measures.			
F	Monitoring practices, corrective actions, and verification tools to assess the effectiveness of mitigation measures.			
G	A process for reporting suspected organic fraud to <u>certifying agents</u> and the <u>NOP</u> .

1)	Do you work with any licensed Customs Brokers?
	☐ Yes ☐ No, continue to question E2.
	a) If yes, does any Customs Broker also do any of the following:
	If any of the following are checked, provide an Exempt Handler Affidavit (EHA) for the Customs Broker so CCOF can determine if certification is required.
	☐ Act as importer of record ☐ Sell imported products ☐ Trade imported products
	☐ Take physical possession of imported products ☐ Take ownership of imported products
2)	Do you import any organic products into the United States or purchase or receive organic products directly from any importers?
	All importers of organic products into the United States must be certified and you must maintain organic certificates for any importer you source from.
	Select all that apply:
	☐ No, no imported products. Stop, this form is complete.
	Yes, I import organic products, I am the importer of record. <i>Importer of record = the owner, purchaser, consignee, or authorized Customs broker of imported products coming into the United States.</i>
	Yes, I purchase imported products from a certified organic importer. Stop, this form is complete. <i>Importers who take title should be listed on your supplier list (H2.0A or H2.6).</i>
	Yes, I directly receive imported products from a certified organic importer who does not take title. Stop, this form is complete. Importers who do not take title do not need to be listed on your supplier list (H2.0A or H2.6) but are still required to be certified and you must maintain their organic certificates. Supplier list (H2.0A or H2.6) must list certified seller (not importer) and you must also maintain seller's organic certificate.
	Yes, I receive imported products from my supplier. Stop, this form is complete. If your supplier purchases imported products, you are not required to know the identity of the importer or maintain their organic certificate. Supplier is responsible for that information.
3)	If you are the importer of record – Are phytosanitary certificates required for any of your imported commodities?
	☐ No ☐ Yes. Have all phytosanitary certificates available at inspection.
4)	Do your imported commodities currently have any Conditions of Entry?
	□ No □ Yes
	a) For products with Conditions of Entry, how do you ensure that only organic compliant treatments are used (ex: cold treatment, carbon dioxide)?
5)	How do you verify that imported products were not treated or exposed to a prohibited substance, fumigated with prohibited substances, or exposed to ionizing radiation?
	Standard Operating Procedure is attached.
	☐ I am notified of shipments that require treatment. Describe notification:
	Other (describe):
6)	If treatment is required, I will notify CCOF, maintain treatment documentation (PPQ Form 203, Fumigation Form 429, and Emergency Action Notification Form 523), and do the following (check all that could apply):
	☐ Treat with organic allowed treatment (ex: cold treatment, carbon dioxide).
	☐ Treat with prohibited treatment and sell as conventional (nonorganic).
	Return shipment to exporter.
	☐ Destroy shipment.
	☐ Other (describe):

Advancing organic agriculture through certification, education, advocacy, and promotion.

Organic Fraud Prevention Plan

Ор	peration Name:	Date:
sta	se this worksheet to describe the monitoring practices and procedures you use to verify suppliers atus of agricultural products received to detect and prevent organic fraud. Also describe the moniterformed to verify that your plan is effectively implemented.	
 	You are responsible for using appropriate and effective means to prevent organic fraud in your plan should reflect the activities, scope, and complexity of your supply chain. This form, including any addendums, may serve as your Organic Fraud Prevention Plan if you integrated into your food safety program and are not enrolled in the OTA Fraud Prevention Solu An Organic Fraud Prevention Plan is a living document that should be updated as needed to reingredients, business practices, supply chains etc.	do not have organic fraud prevention ition program.
	ot all Organic Fraud Prevention Plans will be alike. According to the best practices describerevention Plan may include the elements identified below.	ed by the NOP, an Organic Fraud
Α.	. Supply chain map	
1)	Attach a map of your supply chain, beginning with the certified operations before you in the sup operations that you sell or ship organic products to. You do not need to submit a separate map chains are significantly different. Include steps that happen off-site, such as transportation and storage. If product moves through different facilities, describe the flow across different facilities. Indicate when the product changes ownership, including any importing or exporting.	
	☐ Supply chain map attached	
В.	. Practices for verifying the organic status of any product you acquire and	d/or use
 	You must maintain organic certificates for all suppliers, importers, contracted co-packers, certification storage facilities, and any other certified organic operation you work with. You must ensure that all certificates are current (issued within the last 15 months) and complet products/crops/parcels/brands. If you export product, certificate must list export market compliation of USDA NOP certified operations, refer to Organic Integrity Database (Integrity) for overall cented to be requested separately from the operation.	e; listing specific nce.
1)	Your monitoring system must verify that all suppliers and other organic operations you work wit ingredients/products you source, and/or products they produce for you, and/or products you pro a) How frequently do you review organic certificates? <i>Annual verification is required at a mini</i> With each shipment Monthly Quarterly Annually Annually Other (describe):	oduce for them.
	b) Attach or describe your monitoring system. Be prepared to demonstrate your system at ins	spection.
2)	At receiving, how do you monitor and verify that incoming organic products are from approved that apply or attach a description. Not applicable, I do not take physical possession.	suppliers and are organic? Check all
	Receiving records must be available for review at inspection and must link back to the last cert.	ified handler.
	☐ Approved organic supplier list verified against bill of lading (BOL) or packaging/container lab	
	☐ Current organic certificate required with each shipment, supplier verified as approved, certificate required with each shipment, supplier verified as approved, certificate required with each shipment, supplier verified as approved, certificate required with each shipment, supplier verified as approved, certificate required with each shipment, supplier verified as approved, certificate required with each shipment, supplier verified as approved, certificate required with each shipment, supplier verified as approved, certificate required with each shipment, supplier verified as approved, certificate required with each shipment, supplier verified as approved, certificate required with each shipment, supplier verified as approved, certificate required with each shipment, supplier verified as approved, certificate required with each shipment required with each	

NOPB108, V1, R1, 03/04/2024 Page 1 of 4

Advancing organic agriculture through certification, education, advocacy, and promotion.

C. A process to verify suppliers and minimize supplier risk to organic integrity

▶ Before sourcing from new suppliers or working with any other organic operation, you must review their organic certificate to ensure it is current (dated within the last 15 months) and complete; listing specific products/crops/parcels/brands. If you export product, the organic certificate must list export market compliance.

Do you have a supplier approval program in place to identify, evaluate, and approve new organic suppliers and any other certified

New suppliers and other organic operations you work with must be added to your OSP.

,	organic operation you may work with? Be prepared to demonstrate your system at inspection.
	☐ Yes ☐ No. If no, explain why not:
2)	What is included in your organic supplier approval program? Select all that apply:
	☐ Verification that the supplier's current organic certificate was issued within the last 15 months, includes the list of certified products, and identifies the products I source from them.
	☐ Verification that supplier agrees to meet product specifications for each shipment of product.
	☐ Verification that the supplier participates in 3 rd party food safety audits (GFSI or other) and has a passing score that will be provided to my operation annually.
	☐ Verification that the supplier can meet my quality and quantity demands.
	☐ Verification that the supplier agrees to provide timely organic certificate updates at least annually, or upon demand as needed.
	☐ Verification that supplier can provide product residue sampling results on agreed upon schedule (every shipment, one shipment per week, quarterly samples, etc.).
	□ Verification that the supplier will immediately provide written notification of any positive residue results linked to product purchased by or received by my operation.
	☐ Verification that supplier agrees to annual on-site inspections by representative of my operation.
	☐ Verification that CCOF approves the supplier as part of my OSP supplier list (or other OSP section, as applicable).
	Other, please describe:
3)	How often do you switch suppliers, add new suppliers, make one-off purchases or do "spot purchasing"?
	Frequent changes may result in increased risk of receiving fraudulent products. CCOF may conduct additional audit trail verification at inspections.
	☐ Daily or Weekly ☐ Monthly or Quarterly ☐ Annually ☐ Rarely or Never
D.	Vulnerability assessment to identify weaknesses in your practices and supply chain

- Assess the following areas for vulnerabilities where fraud has a greater chance to occur. Each area includes examples of criteria you may consider when conducting your vulnerability assessment.
- 1) **Product assessment** Consider qualities that are intrinsic to the product (packaging, geopolitical, socio-economic, agronomic):
 - High risk examples: Product has history of fraud, product is bulk/unpackaged, product comes from an area of political unrest/uncertainty, drastic increases or fluctuations in price, high demand, recent production challenges (e.g. flooding, pests), large fluctuations in production volume, or large disparity between organic and nonorganic pricing.
 - Low risk examples: Product packaged in sealed and tamper evident retail packaging, product is readily available in the organic market, product is produced domestically.
- 2) Supply chain assessment Consider the qualities that are inherent to the suppliers you work with:
 - High risk examples: Low visibility of the entire supply chain, long supply chain (product changes ownership many times before it is in your possession), backup supplier not established (could lead to urgent spot purchases), uncertified operations involved in the supply chain, supplier is selling commodity below cost of production.
 - Low risk examples: Established long term supplier relationships, written sales contract addressing organic considerations, supplier readily provides information upon request (organic certificates, specification sheets etc.), supplier is the producer of the organic product, vertically integrated supply chain where the end handler has complete traceability and visibility back to the farm level.

NOPB108, V1, R1, 03/04/2024 Page 2 of 4

Advancing organic agriculture through certification, education, advocacy, and promotion.

3) Internal company assessment

- High risk examples: Past food fraud incidents, inadequate or minimal supplier approval program, inadequate or minimal receiving procedures, lack of Food Defense Plan, no standard procedures requiring sign-off from more than one employee for each transaction, no formal training for employees involved in organic handling or production, only one knowledgeable employee about the Organic System Plan, repeated failure of mass balance or audit trail exercises during inspections or internal audits.
- Low risk examples: Third party food safety certification (GFSI or similar), established employee training program that addresses
 organic fraud, written employee code of conduct, employee screening procedures in place, whistlebower guidelines and
 protection for employees that find internal fraud, history of successful mass balance or traceback exercises during inspections or
 internal audits.

internal audits.
My vulnerability assessment is documented and I can describe my vulnerability assessment at inspection (not required to submit a copy of vulnerability assessment unless requested by CCOF).
My vulnerability assessment is not documented but I can describe my vulnerability assessment at inspection.
Not applicable to my operation

E. Identification of critical control points in the supply chain where organic fraud or loss of organic status are most likely to occur, and mitigation measures

- ► Critical Control Point: A step at which control can be applied and is essential to prevent or eliminate a hazard or reduce it to an acceptable level.
- The following are examples of risks that may require an Organic Critical Control Point (OCCP), the step when control can be applied, and examples of mitigation measures. Refer to vulnerability assessment section D for additional examples of risk that may require Critical Control Points.
 - Product vulnerability example: Product is imported and has a known condition of entry, has a potential for fumigation with prohibited material.
 - ✓ OCCP and mitigation example: **At receiving**, review the import documentation accompanying the shipment for verification that the product was not treated. Product remains on hold until verification is complete.
 - Supply chain vulnerability example: Product is in high demand; I only have one supplier identified and they have a history of shorting orders.
 - ✓ OCCP and mitigation example: **Before making another purchase**, require existing supplier to sign a contract guaranteeing delivery quantities. Identify new potential back-up suppliers.
 - o Internal vulnerability example: My company does not have an established procedure for verifying new suppliers. We frequently change suppliers and select suppliers based solely on the lowest price.
 - ✓ OCCP and mitigation example: Before making another purchase, establish a supplier verification program and screen existing suppliers against our verification program requirements. We will not purchase from suppliers that do not pass our supplier verification program requirements.

1)	Based on your vulnerability assessment, have you identified Organic Critical Control Points (OCCPs) in your supply chain? OCCPs must be established for the vulnerabilities where there is the highest risk of fraud or loss of organic status.
	My critical control points are documented and I can describe my critical control points at inspection (not required to submit a copy of critical control points unless requested by CCOF).
	☐ My critical control points are not documented but I can describe my critical control points at inspection.
	☐ Not applicable to my operation
2)	For each Organic Critical Control Point, have you developed and implemented mitigation measures to eliminate or reduce the risk for fraud or loss of organic status?
	My mitigation measures are documented and I can demonstrate my mitigation measures at inspection (not required to submit a copy of mitigation measures unless requested by CCOF).
	☐ My mitigation measures are not documented but I can demonstrate my mitigation measures at inspection.
	☐ Not applicable to my operation

NOPB108, V1, R1, 03/04/2024 Page 3 of 4

Advancing organic agriculture through certification, education, advocacy, and promotion.

F. Monitoring practices, corrective actions, and verification tools to assess the effectiveness of mitigation measures

1)	Do you have monitoring procedures to ensure that the mitigation measure for each Organic Critical Control Point is met and corrective actions should your mitigation measures fail?
	☐ My monitoring and corrective action procedures are documented, and I can demonstrate them at inspection (not required to submit a copy of monitoring practices unless requested by CCOF).
	☐ My monitoring and corrective action procedures are not documented, but I can demonstrate them at inspection.
	☐ Not applicable to my operation
2)	How do you verify that your Organic Fraud Prevention Plan is effective? Select all that apply.
	☐ Internal audits ☐ Periodic review of records for quality control ☐ Annual review of Organic Fraud Prevention Plan
	☐ Other, describe:
G.	A process for reporting suspected organic fraud to certifying agents and the NOP
ightharpoons	Organic fraud: Deceptive representation, sale, or labeling of nonorganic agricultural products or ingredients as organic.
1)	Describe your criteria for reporting suspected fraud.
	Select all that apply:
	☐ I report all positive sample results linked to organic products I handle.
	☐ I report instances where I have observed fraudulent activity.
	☐ I report instances where the quantity of organic product received from a supplier exceeds their known production capacity and can provide credible evidence.
	☐ I report instances where an organic product is being offered for sale below market price without reasonable explanation and can provide credible evidence.
	☐ I report all other instances where I can provide credible evidence of fraud. Credible evidence may include but is not limited to: photos, screen shots of websites, audit trail records, copies of correspondence, residue sample results, GMO sample results, etc.
	Other (describe):
_\	
2)	What is your process for reporting credible evidence of organic fraud? Select all that apply:
	Report to CCOF
	Report to supplier's <u>certifying agent</u>
	Report to USDA NOP
	Report to California Department of Food and Agriculture (CDFA) State Organic Program for operations in CA
	Other (describe):

NOPB108, V1, R1, 03/04/2024 Page 4 of 4

Advancing organic agriculture through certification, education, advocacy, and promotion.

Exempt Handler Affidavit Instructions

- 1) The CCOF-certified operation completes section A on the following page. This affidavit and any sample audit trail records will become part of the CCOF-certified operation's Organic System Plan (OSP).
- 2) The uncertified handler completes sections B through F. If an exempt, uncertified handler works with multiple CCOF-certified operations, a separate Exempt Handler Affidavit (EHA) is required for each CCOF-certified operation as activities may vary.
- 3) A new Exempt Handler Affidavit (EHA) is only required if there is any change in the future, including a change in activities or management of the exempt handler. An updated EHA may be requested by CCOF at any time.
- 4) CCOF-certified operations will be billed an initial fee for each Exempt Handler Affidavit (EHA), outlined in the CCOF Certification
 Services Program Manual. Refer to the table in section C. If an EHA is submitted but not required, requested, or approved by CCOF, billing does not apply.
- 5) Certification (not this affidavit) is required for any of the following:
 - a) Storage facilities or warehouses receiving organic product that is not in sealed, tamper-evident* packaging.
 - b) Storage facilities where unpackaged product is loaded or unloaded before being loaded into the next transport vehicle (transporter not required to be certified unless otherwise handling).
 - c) Broker, traders, wholesalers, or distributors who sell organic products that are not in sealed and tamper-evident* final retail packaging.
 - d) Importers of organic products into the United States.
 - e) Exporters of organic products for sale in the United States.
 - f) Private label or brand owners who purchase organic ingredients for their co-packers.
 - g) Private label or brand owners who sell organic products in nonretail packaging or sell finished organic products in packaging that is not sealed or tamper-evident* unless private label brand owner can demonstrate exemption.
 - h) Transporters and transloaders who pack, repack, treat, sort, open, enclose, label, or otherwise handle organic products. These activities are not considered transportation.
 - Transporters and transloaders who combine, split, or containerize organic products where the activity of combining, splitting, or containerizing is not contracted by a certified organic operation or is not described in a certified operation's Organic System Plan (OSP).
 - Brokers, traders, wholesalers, distributors, importers, private label brand owners, and storage facilities are considered handlers per NOP § 205.2 "Handle, Handler". Exemptions from certification requirements are outlined in NOP § 205.101 and Strengthening Organic Enforcement Final Rule section A.
- 6) *Tamper-evident packaging is packaging or a container that is sealed in a manner where an attempt to break the seal, access the contents, or reclose the package would be obvious. For 205.101(e) exemption to apply, either the retail or nonretail package must be sealed and tamper-evident. For 205.101(f) exemption to apply, the retail package must be sealed and tamper-evident, the nonretail package is not relevant.
 - a) **Examples of nonretail tamper-evident packaging**: Produce boxes with "DO NOT TAMPER WITH" tape placed across box flaps, sealed bulk bags of flour, sealed drums or totes of olive oil.
 - b) **Examples of retail tamper-evident packaging**: Aseptically sealed jars, boxes of individually wrapped granola bars, clamshells with sticker closing the clamshell, zip-top produce bags sealed with sticker or strip that consumer must rip off to open, salad container with film top that must be ripped off to open, produce individually wrapped in plastic, mesh bags with a label that seals the bag and must be ripped off to open.
 - c) Examples of packaging that is NOT tamper-evident: Clamshells without a sticker closing the clamshell, unsealed zip-top bags, mesh bags with a closure that could be removed without damaging the packaging or label, produce with PLU label not enclosed in any packaging, baled hay.
- A helpful resource to determine if certification is required is CCOF's <u>Organic Certification Self-Assessment</u>.

Exempt Handler Affidavit

A. CCOF-Certified Operation

B. Uncertified Handler

The CCOF-certified operation completes section A.

The uncertified handler completes sections B through F.

- Name of CCOF operation working with uncertified handler:
- 2) Describe the business relationship between your operation and the uncertified handler. Include the activities performed by the uncertified handler on your behalf

Uncertified handler operation name:			
Man	ager/Owner name:		
Ema	il:		
Pho	ne: Website:		
Addı	ress:		
Desc	cribe your role in the organic supply chain for the CCOF-certified operation named in section A.		
	Exemptions ertified Handler – Indicate the exemption that describes your operation, you may select more than one	e option:	
1)	☐ I operate a storage facility used by the CCOF-certified operation listed in section A to store product in sealed, tamper-evident packaging*. NOP § 205.101(e)	This form is required	
2)	☐ I am a broker, trader, wholesaler, or distributor who takes title or physical possession of organic products. Products are sealed in tamper-evident* final retail packaging and remain in that packaging while in my control. That product (retail labeled, sealed, tamper-evident*) is supplied to the CCOF-certified operation listed in section A. NOP § 205.101(f)	This form is required	
3)	☐ I am a private label or brand owner and the CCOF-certified operation packs organic products into my brand(s). I do not process products. NOP § 205.2 ("handle"), 205.101(b), 205.101(c), 205.101(e), 205.101(f)	This form may be required by CCOF	
4)	☐ I am a licensed customs broker who does not take ownership or physical possession of organic products. I do not sell, import, or trade organic products. NOP § 205.101(g)	This form is optional	
5)	☐ I am a logistics broker, e.g., freight forwarder. I arrange for movement and storage but do not take ownership or physical possession of organic products. I do not sell, import, or trade organic products. NOP § 205.101(h)	This form is optional	
6)	☐ I am a transporter or transloader and am only responsible for the transport of organic products. I do not store, pack, repack, treat, sort, open, enclose, label, or otherwise handle organic product. NOP § 205.2 ("handle")	This form is optional	
7)	☐ I am a transporter or transloader contracted/hired by a certified operation. I may combine, split or containerize organic products as contracted by the certified operation and described in their Organic System Plan (OSP). NOP § 205.2 ("handle")	This form is optional	
8)	☐ I facilitate sale or trade of unpackaged product and/or live animals. Certification may be required. NOP 205.2 ("handle")	This form is required	
9)	☐ Other, describe activities:	This form is required	

Where this form is noted as optional above, CCOF reserves the right to require the form to determine compliance with NOP § 205.101.

NOPB107, V2, 12/31/2023 Page 2 of 5

Advancing organic agriculture through certification, education, advocacy, and promotion.

D. Exemption Verification

Uncertified handler, complete this section. Answer these questions about the handling you perform for the CCOF-certified operation named in section A. If you work with other CCOF-certified operations, you will need to complete additional Exempt Handler Affidavits to describe the handling you perform for each operation. CCOF will review answers to determine if exemption applies.

		Yes	No
1)	Do you handle unpackaged products? Examples: tankers, grain elevators or silos, bulk railcars/truckloads of unpackaged product, livestock. Operations that store, sell, or otherwise handle unpackaged products must be certified. Transport of unpackaged products or livestock may not require certification, provided the certified operation's Organic System Plan describes transport practices and records. a) If yes or unsure, describe:		
2)			
2)	Do you combine, split, or containerize organic products?	Ш	Ш
	a) If yes or unsure, describe:		
3)	Do you relabel, repack, package, enclose, or apply any label that alters or obscures the original label or lot number/code? Repacking includes placing product into other packaging that displays organic claims.		
	a) If yes or unsure, describe:		
4)	Do you sort, recondition, cull, ice, hydro cool, hydro vacuum, or otherwise process organic product in any way?		
	a) If yes or unsure, describe:		
5)	Do you treat organic products or apply any substance to the organic product such as water, ethylene, sanitizers, pesticides, or controlled atmosphere treatment?		
	a) If yes or unsure, describe:		
6)	Does organic product ever contact cleaners, sanitizers, pest control materials, nonorganic products, water that has contacted nonorganic products, or other materials while under your control?		
	a) If yes or unsure, describe:		
7)	Do you import organic products into the United States?		
	a) If yes or unsure, describe:		
8)	Do you export organic products from a foreign country to the United States?		
	a) If yes or unsure, describe:		
9)	Is the organic product packaged or enclosed in a sealed, tamper-evident* container prior to being received or acquired by your operation, and does it remain in that same sealed, tamper-evident* container while under your control?		
	a) If yes, describe how packaging is sealed and tamper-evident* or attach a photo:		
	b) If no, describe:		
10)	How is the organic product labeled when you receive, acquire, or purchase it? Attach an example of product labeling		
	Product is in final retail labeling. Attach example label. Retail label = Labels affixed to containers intended to be product in final retail labeling. Attach example label. Retail label = Labels affixed to containers intended to be product is in final retail labeling. Attach example label. Retail label = Labels affixed to containers intended to be product is in final retail labeling.	urchase	ed and
	☐ Product is labeled nonretail. Attach example label. Nonretail = Any container used to ship or store organic product containers used for retail sale of the product. Nonretail labels must identify product as organic and display the lot other unique information that links to the audit trail records.		
	 ☐ Product is unlabeled bulk. Attach example signage. Temporary signage must indicate organic status and include ☐ Not applicable, I do not receive, acquire, or purchase the organic product, describe: 	lot num	ber.

NOPB107, V2, 12/31/2023 Page **3** of **5**

Advancing organic agriculture through certification, education, advocacy, and promotion.

		Yes	No
11)	Do your audit trail records for each shipment include the information described in section E below? You may attach sample documents to demonstrate your system; all records must be provided to the CCOF-certified operation and will be verified during CCOF inspections.		
	Your audit trail records must link back to the last certified organic operation.		
12)	Do you take physical possession of organic products; are organic products received at a location that you own or lease?		
13)	Do you buy (take ownership/title), sell, or trade organic products, or facilitate the sale or trade of organic products on behalf of a seller or yourself?		
	Exemption 205.101(e) does not apply if you buy, sell, or trade organic products.		
	a) If you facilitate the sale or trade of organic products, describe:		
14)	Do you prepare organic products for shipment?		
	Preparing for shipment = putting packaged products into shipping containers, applying internal tracking numbers, shrink-wrapping shipping cartons to a pallet, breaking down pallets of fully packaged products, adding protective packaging to nonretail containers, packing individual packaged products onto a shipping pallet, loading/unloading packaged products onto or from transport vehicles.		
	a) If yes, describe how you prepare products for shipment:		
15)	Transporter or transloader – Do you load or unload unpackaged products at uncertified locations?		
	Certification of location(s) where unpackaged products are loaded or unloaded is required. Transport of unpackaged products or livestock may not require certification, provided the certified operation's Organic System Plan describes transport practices and records.		
	☐ Not applicable, I am not a transporter or transloader.		
16)	Private label brand owner – Do you ever purchase ingredients sent to co-packers?		
	☐ Not applicable, I am not a private label brand owner		
	a) If yes, are purchased ingredients in sealed, tamper-evident, retail packaging?		
	□ No, purchased ingredients are nonretail packaged or not in tamper-evident packaging. Certification of label or required; certificate must list purchased ingredients.	wner is	
	Yes. Attach example label.		
17)	Private label brand owner – Do you ever take physical possession of ingredients sent to co-packers?		
	☐ Not applicable, I am not a private label brand owner		
	a) If yes, are ingredients in sealed, tamper-evident packaging?		
	☐ No, ingredients are not in tamper-evident packaging. Certification of label owner as a storage facility is require	ed.	
	☐ Yes. Attach photo showing how packaging is tamper-evident.		
18)	Private label brand owner – Attach any additional information including references to USDA NOP regulations or othe that you believe justify your activities as exempt from certification.	r regula	tions
	Certification may not be required if you qualify for exemption under 205.101(b), 205.101(e), 205.101(f), or do not per activities outlined in 205.2 "Handle."	form an	У
	☐ Not applicable, I am not a private label brand owner☐ Attached		
19)	Storage facility – indicate the type of storage:		
. •)	☐ Not applicable, I am not a storage facility ☐ Dry storage ☐ Cold storage ☐ Freezer storage		
	☐ Other, describe:		

NOPB107, V2, 12/31/2023 Page 4 of 5

Advancing organic agriculture through certification, education, advocacy, and promotion.

		Yes	NO
20)	Broker, trader, wholesaler, distributor		
	☐ Not applicable, I am not a broker		
	a) Describe how frequently you change organic suppliers:		

E. Audit Trail Records

Uncertified Handler – CCOF-certified operations may only work with exempt handlers who provide full traceability back to the last certified operation for each shipment. The following are required for traceability:

- 1) Nonretail containers used to ship or store organic products must identify product as organic and display the production lot number, shipping identification, or other unique information that links to the audit trail records.
- 2) Purchase invoices, receipts, bills of lading (BOL), and other audit trail records must:
 - Designate products as organic AND
 - Include a description of the product, date of transaction, and amount transferred. You may strike out pricing information, provided organic status and quantity is legible.
- 3) Exempt handler records and the last certified operation's records must link:
 - The last certified operation that handled the product must be listed on exempt handler invoices/records AND/OR
 - Lot numbers applied by the last certified operation to nonretail containers must match lot numbers on exempt handler audit trail records AND
 - If product passes through multiple uncertified exempt operations in sequence, documents must trace product lot number through all uncertified operations back to the last certified handler.
- 4) For each shipment, exempt handlers must provide a complete, current organic certificate for the last certified operation.
- 5) Documents generated by the last certified operation proving purchase, delivery, and/or transfer to the exempt handler must be provided to the CCOF-certified operation.
 - Exempt handler audit trail records must link directly back to the last certified operation, including transport, storage, processing/handling, shipping, and/or distribution. Documents must show that organic integrity was maintained: organic products did not come into contact with nonorganic products or prohibited materials such as fumigants.
- 6) All certified suppliers must be approved by CCOF as part of the certified operation's Organic System Plan (OSP). Notify your CCOF-certified buyer prior to changing suppliers.

Exempt operations must maintain records per NOP § 205.101(i). CCOF-certified operations must maintain records per NOP § 205.103. If CCOF inspectors cannot track organic product back to the last certified operation, sourcing organic products from the exempt handler may be considered a noncompliance.

F. Exempt Handler Statement

I, the owner or legally authorized representative, attest that I am qualified to assess the validity of the statements in this affidavit and the statements are true and accurate to the best of my knowledge. Note that per NOP 205.100(c)(2), any person falsifying statements to an accredited certifying agent shall be subject to the provisions of section 1001 of title 18, United States Code.

I acknowledge the above requirements for audit trail records and disclosure to the CCOF-certified operation and understand that failure to meet the audit trail record requirements or disclose records to the CCOF-certified operation may be cause for CCOF to rescind approval of my operation as an approved exempt organic handler and may be cause for compliance action against the CCOF-certified entity.

Name (Manager/Owner of Exempt Handler) Signature

Signature (Digital, Ink, or E-Verified)

Date

Visit www.ccof.org to apply for certification. Questions about the certification process? Email getcertified@ccof.org.

CCOF reserves the right to inspect any facility storing or handling organic product owned by a CCOF-certified operation per NOP 205.400(c). If the exempt handler misrepresents policies or procedures as stated on this affidavit or acts in a manner that might jeopardize organic integrity or tracking of the organic product, the CCOF- certified operation working with the exempt handler will be notified. The CCOF-certified operation will be held responsible for correcting any noncompliance issues. CCOF will report uncertified handlers who are handling organic products but are not exempt to the USDA NOP for investigation and potential civil penalties.

require a different CCOF program and application:

- **Mexico Compliance Program:** US based operations who plan to export to Mexico. www.ccof.org/page/ccof-international-programs
- GMA Wine program: US operations who plan to export wine to the EU, UK, or Switzerland. You must complete the GMA application (this form) and the GMA Wine Approval Application.

A. General Information

Ор	eration Name:	Client Code: Date:
1.	Which foreign markets are you planning to export to, directly or indirectly (as an ingredient or through brokers/traders, etc.)?	☐ Canada ☐ EU/UK ☐ Japan ☐ Korea ☐ Switzerland ☐ United States ☐ Taiwan ☐ Other:
2.	Growers: What crops do you plan to export directly or indirectly (as an ingredient or through brokers/traders, etc.) to these foreign markets?	N/A, I do not grow crops.All crops from all parcels.Limited, describe:
3.	Handlers: Submit a Product Application to indicate which products will be exported directly or indirectly (as an ingredient or through brokers/traders etc.) to these foreign markets. Brokers: Submit your H2.6 Broker Suppliers list to indicate which products will be exported.	☐ Product Application or H2.6 Broker Suppliers attached
4.	How do you prevent export of products that are not compliant for the destination market? Select all that may apply.	 □ Crops, ingredients, and finished products meeting different international standards are separated and clearly labelled in storage. □ Inventory system tracks ingredients that are compliant for export. □ Lot coding system indicates products that are compliant for export. □ Sales system only allows export of compliant products. □ Customer is responsible for export. I indicate each product's international compliance to my customer. □ All parcels are compliant for all international markets. □ Other, describe:

B. Labeling and Product Identification

▶ All labels used for exported products must meet the labeling requirements of the importing country. Each country has different labeling requirements. Review the International Market Labeling Guide for more information. CCOF only reviews English or Spanish language and national organic seals. Work with your importer to ensure that labels meet other requirements in the destination market, in addition to organic requirements.

1.	How are your exported products labelled? Select all that may apply to any exported product. Ensure export labels and documents meet requirements in the International Market Labeling Guide.	 I use export labels that are different from my domestic labels. Submit all export labels to CCOF for pre-approval prior to printing. I use the same labels that are already approved for domestic sales. Importer labels product and has ensured that labels meet the requirements of the destination market. CCOF does not review labels applied by your importer. Product is bulk/wholesale (non-retail) and required information is provided in shipping/sales documents. Allowed for EU, Japan, Korea, Switzerland, Taiwan, and UK. Allowed for export to Canada only when product is unpackaged i.e.
		shipped by railcar. N/A, do not directly export. Describe:
2.	For retail products exported to Japan, how is the JAS seal applied? Visit www.ccof.com/japan for more information.	 N/A, no retail products exported to Japan. JAS certified importer applies their JAS seal in Japan. CCOF does not review labels applied by your importer. I have signed a JAS Seal Consignment Contract with my JAS certified importer to apply their JAS seal directly to products in the US or Canada. I have direct JAS certification through a JAS accredited certifier.
3.	Do your export labels meet domestic labeling requirements?	 No. Containers and documents are marked "For Export Only" and evidence will be available during CCOF inspections. <i>Required</i>. ☐ Yes. Export labels meet domestic labelling requirements.

C. NOP Exports (Operations in the US/Mexico): Terms and Critical Variances (Only answer for applicable markets)

If you are exporting products produced or manufactured by other operations, you will need to demonstrate that the entire supply chain is compliant or equivalent to the destination market. CCOF does not require additional verification for NOP certified products when they are not at risk of the critical variances for the destination market.

Market	Management Practice/Concern	Answer
Canada (Prohibited)	Growers: Do you use sodium (Chilean) nitrate on your crops?	 N/A, I do not grow crops. No, I do not use sodium nitrate on my crops. Yes, I use sodium nitrate on my crops. <i>Prohibited for export to Canada</i>. Sodium nitrate is used on some crops but not others. Describe:
Canada (Prohibited)	Growers: Do you use hydroponic or aeroponic production methods?	 N/A, I do not grow crops. No, hydroponic/aeroponic methods are not used. Yes, hydroponic/aeroponic methods are used. Prohibited for export to Canada. Hydroponic/aeroponic methods are used for some crops but not others. Describe:
Canada (Required)	3. Handlers: Do you have supplier documentation that exported products were not produced using sodium (Chilean) nitrate?	 N/A, no suppliers.
