

Operation Name: _____ **Date:** _____

- ▶ Use this form for each multi-ingredient product you manufacture. *Wineries should complete the V2.0 and V2.1 forms, not this form. Private label/marketers who do not process products are not required to complete this form. Livestock feed producers are not required to submit all formulations, only a sample.*
- ▶ Visit www.ccof.org/documents or contact CCOF for an **Excel version** of this document, which auto-calculates and can be used for one or more products. Complete one sheet for each product.
- ▶ See formulas below headers to guide your calculations.
- ▶ For each nonorganic ingredient or processing aid not previously approved by CCOF, submit a Nonorganic Processing Material Affidavit or Natural Flavor Affidavit. Search for approved materials on MyCCOF.org.

Product Name:				
Label Brand Name(s):				
Ingredient	Quantity (A)	Weight, %, or fluid volume	% Organic Content of Ingredient (B)	Ingredient's Org. Contribution to Product (C) = AxB
Example Ingredient	20	grams	95%	19 = (20x0.95)
Total of non salt and water contents (D):			Organic Contribution (G): Total of column (C)	
Total column (A)				
Quantity Salt (E):				
Quantity Water (F):			Total Organic %: Divide G/D	
Total Ingredient Quantity: Add up D, E and F				

Round down to nearest whole number

List processing aids* used, including packaging aids (i.e. Carbon Dioxide, Chlorine in wash water) if not listed above. *Only ingredients and materials approved by CCOF and appearing on your Handler Materials Application (OSP Materials List) may be used:*

*Products labeled "100% Organic" must be produced without nonorganic processing/packaging aids, including sanitizers or gases.
