Operation Name: __________________________ Date: __________________________

Complete this form if you take physical possession of products you sell or distribute, or run a processing or handling facility.

Facility covered by this form:

A. Harvest
1) Do you harvest organic crops and/or contract out harvest of organic crops?
Records and organic certificates must show that harvested parcels are certified and harvest equipment is cleaned or purged.
☐ No  ☐ Yes. Complete sections A & B on G6.1 Harvest & Transport

B. Receiving
1) Do any products arrive unsealed or in permeable packaging (ex: clamshells, open boxes, trucks) or in reusable containers or vehicles (ex: RPCs, tankers, railcars)?
Transporters that combine or split unpackaged loads must be certified organic, except milk haulers.
☐ Yes  ☐ No
a) If yes, how do you ensure contamination and commingling were prevented during transport (ex: protection from sanitizer residue, gases, liquids)? Check all that apply.
Transporter records must be available for review at inspection, ex: bill of lading, manifest, transaction certificate, shipping and delivery records, invoices, chain of custody, truck and trailer numbers, lot number.
☐ Clean truck affidavit  ☐ Cleaning and sanitizing material records  ☐ Certified supplier provides documentation
☐ Truck cleaning procedures  ☐ Wash tags  ☐ Tanker Seals
☐ Other (describe):

2) At receiving, how do you verify that incoming organic products are from approved suppliers, including shipments from uncertified brokers, traders, wholesalers, or distributors? Check all that apply or attach a description.
Receiving records must document verification and be available for review at inspection.
☐ Approved organic supplier list verified against BOL or packaging/container labels
☐ Current organic certificate required with each shipment, supplier verified as approved, certificate verified to list product received
☐ For shipments from uncertified vendors, record uncertified handler, certified supplier, and certified supplier lot # on receiving log
☐ Other (describe):

C. Storage
1) How do you ensure organic products are not commingled with nonorganic products in storage?
☐ Not applicable, all organic  ☐ All products sealed and labeled  ☐ Storage areas dedicated to, and identified as, organic
☐ Other (describe):

D. Packaging & Shipping
1) Are all packaging materials free of prohibited materials (ex: fungicides, preservatives, fumigants)? Contact packaging manufacturer if you are unsure.
☐ Yes  ☐ Not applicable, no packaging

2) How do you prevent commingling of outgoing organic and nonorganic products?
☐ Organic never shipped with nonorganic  ☐ Clearly labeled packages/pallets  ☐ Organic product sealed or shrink wrapped
☐ Separate areas in vehicle  ☐ Other (describe):
3) Are any products shipped in unsealed or permeable packaging (ex: clamshells, open boxes, trucks) or in reusable containers/vehicles (ex: RPCs, tankers, railcars)?

Transporters that combine or split unpackaged loads must be certified organic, except milk haulers.

☐ Yes  ☐ No

a) If yes, how do you ensure contamination and commingling will be prevented during transport (ex: protection from sanitizer residue, gases, liquids)? Check all that apply.

☐ Clean truck affidavit  ☐ Cleaning and sanitizing material records  ☐ Certified supplier provides documentation

☐ Truck cleaning procedures  ☐ Wash tags  ☐ Tanker Seals

☐ Other (describe):

---

E. Water and Water Additives

Water used in organic production must be potable and meet Safe Drinking Water Act (SDWA) standards.

1) Is water used as an ingredient in organic products or used in direct contact with organic products, ex: wash or flume water or crops washed in the field?

☐ No. Skip to question E4.  ☐ Yes. Complete this section.

2) If you treat water on-site (ex: RO, UV, carbon filtration, water softeners, pH adjustment), does treated water meet Safe Drinking Water Act Standards? Contact treatment manufacturer if you are unsure.

☐ Yes. CCOF may request documentation that treated water meets Safe Drinking Water Act standards.

☐ N/A, water not treated

3) Is water used in direct contact with organic products, ex: wash water?

☐ No. Skip to question E4.  ☐ Yes. Complete this section.

a) If yes, do you add any substances to water that contacts organic products, ex: peracetic acid, hydrogen peroxide, chlorine?

☐ No

☐ Yes. List materials on your Handler Materials Application (OSP Materials List).

b) Do you add chlorine to water that directly contacts organic products?

☐ No  ☐ Yes. Attach records or SOP used for monitoring chlorine. Records or SOP will be verified by your inspector.

1. If yes, do products undergo a final fresh water rinse?

☐ Yes  ☐ No, chlorine never added to water above SDWA limits

4) Does steam contact organic products or packaging?

☐ No. Skip to section F.  ☐ Yes. Complete this section.

a) If yes, and boiler chemicals are used, attach an ingredient statement for each. List materials on your Handler Materials Application (OSP Materials List)

☐ Attached  ☐ N/A, no boiler used

b) If volatile boiler chemicals are used, describe how you prevent organic products from contacting volatile boiler chemicals, e.g. by shutting off boiler chemical feed prior to organic runs (specify # of hours) and conducting condensate tests:  ☐ Attached
F. Equipment Cleaning and Sanitization

1) List all equipment and surfaces that organic products contact during receiving, handling, processing, transport, or storage, including grading or sampling equipment. Describe cleaning and sanitization that happens before organic runs or provide this information as an attachment (ex: SSOP for organic):  □ Attached

<table>
<thead>
<tr>
<th>Organic Equipment/Contact Surface</th>
<th>Cleaned? (Y/N)</th>
<th>Purged*? (Y/N)</th>
<th>Rinsed? (Y/N)</th>
<th>Documentation (ex: wash tag, cleaning/production log)</th>
</tr>
</thead>
<tbody>
<tr>
<td>(ex: totes, processing lines, reused storage containers)</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

*Purge – To expel nonorganic product prior to processing organic product from food processing equipment (when equipment cannot be cleaned).

2) If any surfaces listed above are NOT either cleaned or purged prior to each organic run, explain why not:

3) If equipment is purged between runs, describe the purge procedure, including the product and quantity purged, where it goes, and how this is documented. □ Attached

4) For organic contact surfaces listed above, do you use any sanitizers or detergents/cleaners that are not rinsed?
   □ No  □ Yes. List each material on your **Handler Materials Application (OSP Materials List)**.

5) How do you ensure residues from prohibited materials (ex: quaternary ammonia) are removed from organic contact surfaces?
   □ Not applicable  □ Rinsing (required for quaternary ammonia)  □ Complete drying of alcohol-based sanitizers
   Residue Testing:  □ pH  □ Quaternary Ammonia  □ Other testing: ______________________________________

6) If cleaning is NOT documented, explain why not:

G. Facility Pest Management

1) Which of the following management practices do you use to prevent pests? You must use at least one:
   □ Remove pest habitat, food sources, and breeding areas  □ Prevent access to handling facilities
   □ Manage environmental factors to prevent pest reproduction (temperature, light, humidity, atmosphere, air circulation)
   □ Other (describe):

2) Which of the following practices do you use to control pests in organic production and storage areas?
   □ N/A, none used  □ Mechanical or physical controls, including traps, light, or sound
   □ Lures and repellents using nonsynthetic or synthetic substances consistent with the National List. List lures and repellents that you apply in organic production and storage areas on your **Handler Materials Application (OSP Materials List)**.

3) Are the measures listed above sufficient to prevent or control pests?
   □ Yes  □ No  □ N/A, none used
   a) If no, list pest control materials from the National List that you apply in organic production and storage areas on your **Handler Materials Application (OSP Materials List)**. □ Attached
   Prevention and control methods described in G1 and G2 above must be implemented before National List materials may be used. National List materials include carbon dioxide, nitrogen gas, Vitamin D3 bait, boric acid, diatomaceous earth and soap products.
4) Are National List materials on your OSP Materials List sufficient to prevent or control pests?
   ☐ Yes ☐ No ☐ N/A, none used
   a) If no, explain below (or attach justification). List pest control materials not on the National list that you apply in organic production and storage areas on your Handler Materials Application (OSP Materials List).
      ☐ Letter of justification attached

5) How do you prevent pest control materials from contaminating organic products, ingredients, and packaging materials?
   ☐ Remove product and packaging from areas to be treated ☐ Wash and rinse organic contact surfaces after treatment
   ☐ Cover equipment used for organic handling during treatment ☐ Purge equipment with nonorganic product after treatment
   ☐ Other (describe):

6) Where do you record pest control material use and measures taken to protect organic products or packaging?
   ☐ Pesticide Use Log ☐ Log describing removal/reentry of products and packaging ☐ Purge log
   ☐ Other (describe):
