Canadian Organic Regime (COR) Nonorganic Processing Material Affidavit

The CCOF Canadian Organic Regime Compliance Program is ONLY for operations located in Canada

CCOF Client: Forward this affidavit to your material manufacturer. They must complete and sign this form. Submit one affidavit for each nonorganic ingredient or processing aid on the Permitted Substances List or agricultural ingredients used in your organic products. Search for approved materials on MyCCOF.org.

Material Manufacturer: Fill out this form so CCOF can review this material for the CCOF certified client's use.

A. Manufacturer Business Name: _____

Function: _____

List all ingredients or attach complete ingredient statement. Attached

Attach either a copy of the label disclosing **all ingredients of the material**, a copy of the MSDS (if all ingredients are disclosed), or a current statement which discloses all ingredients. Attached

B. The material listed above conforms to the following criteria:

	True	False
1. Genetic engineering was not used in the production of this material.	<input type="checkbox"/>	<input type="checkbox"/>
2. Irradiation was not used in the production of this material.	<input type="checkbox"/>	<input type="checkbox"/>
3. Sewage sludge was not used in the production of this material.	<input type="checkbox"/>	<input type="checkbox"/>
4. Nanotechnology was not used in the production of this material.	<input type="checkbox"/>	<input type="checkbox"/>
5. Cloned livestock and its descendants were not used in the production of this material.	<input type="checkbox"/>	<input type="checkbox"/>

C. I am qualified to assess the validity of the statements above, which are true to the best of my knowledge.

Manufacturer Representative's Name & Title (please print)

Manufacturer Representative's Authorized Signature

Date

D. Allowed food additives, other ingredients not classified as food additives, and processing aids are listed in section 6 of the CAN/CGSB-32.311 Permitted Substances List (PSL). Many of these allowed substances (such as activated charcoal, enzymes, lecithin, sodium bicarbonate, etc) have restrictions placed on their use or source. CCOF may require additional information for any substance that has an annotation to verify compliance.
