

Go International with CCOF

# CCOF INTERNATIONAL PROGRAMS

**Exporting your CCOF organic product.**  
**An organic partner with global recognition.**

## About CCOF

Since 1973, CCOF has been advancing the organic movement and now certifies operations in the United States, Mexico, and Canada. We have a long history of international market recognition and close collaboration with domestic and foreign government agencies to ensure your products have the best access to global markets. CCOF has developed several programs to provide your products with the necessary review and export documents to sell your organic products around the world!

## Operations Located in the United States:

CCOF is here to certify your product to the USDA National Organic Program (NOP) standard and support your product's journey abroad. Our Global Market Access (GMA) program reviews your product to the USDA equivalence arrangements and provides you with the necessary export documentation to export your product to Canada, the European Union, United Kingdom, Japan, Korea, Switzerland, Korea, and Taiwan.

CCOF can also help your products enter the Mexico market through certification or recertification to the Mexico organic standards (LPO). Operations seeking direct Japanese Agricultural Standard (JAS) certification can take advantage of CCOF's inspection partnership with ACO Certification LTD.

## Operations Located in Mexico:

Our Mexico Compliance Program provides certification to the Organic Products Law (LPO) standards of Mexico as well as the USDA NOP standards, allowing your product to be sold in the both Mexico and the United States. CCOF can also support your exports to Canada through our GMA program which provides the necessary review and export documentation.

## Operations Located in Canada:

Our Canadian Organic Regime (COR) Compliance program provides organic certification to the COR standards for operations located in Canada. COR certified clients may enroll in our GMA program for review of your product and labels to countries where Canada has established organic equivalencies. Our GMA program provides your operation with the required export documents to ensure smooth exporting of your products to the United States, the European Union, United Kingdom, Korea, Japan, Switzerland, and Taiwan.

## Ready to take your product global or have questions?

CCOF is here to work with you! Call us directly at (831) 423-2263 or email [export@ccof.org](mailto:export@ccof.org). To learn more about the organic international marketplace, visit [www.ccof.org/international](http://www.ccof.org/international).
