

The Value of **ORGANIC FARMS**

Organic farms are central to a resilient and prosperous future

Organic farms build healthy soils that **conserve water** and prevent pollution.

Organic food **promotes** patient **health** through higher levels of vitamins, minerals, and antioxidants.

Organic farming removes **14 times more carbon** from our atmosphere than non-organic farming.

Organic food in school **gives kids** the **nutrients** they need and protects the water they drink and the soils that grow their food.

Organic outpaces sales of all other food sectors, creating **economic opportunity**.

Organic farms reinvest dollars within the community by selling locally and **creating jobs**.

Organic farms are **better prepared** to supply food under a changing climate.

**WELCOME TO AN
ORGANIC
CALIFORNIA!**

ORGANIC CAN FEED THE WORLD.

Funding for Organic Market Development Grant Program was made possible by a grant from the U.S. Department of Agriculture (USDA) Agricultural Marketing Service. Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the USDA.
