

Animal Transport Affidavit

- Use this affidavit to affirm that all organic animal transport requirements are met.
- Though transportation does not require certification, organic livestock operations are responsible for maintaining complete transportation records for their animals. Operations must also demonstrate prevention of commingling and contamination during transport, & fully describe the transport practices in their OSP (if overseeing the transportation.).
- Maintain one affidavit per shipment of livestock.

Transportation Service Provider Information

Name of transportation business	
Transporters full name	
Date and time of animal pickup	
Name of certified operation where animals are being picked up	
Physical address of animal pickup	
Date and time of animal drop-off

Livestock Information

Name of certified livestock operation	
Livestock owner full name	
Type(s) of animals being transported	<input type="checkbox"/> Ruminant animals: Attach list of animals and their organic status, including organic slaughter eligibility status, with this affidavit. <input type="checkbox"/> Avian species. Animals are identified as organic as described and approved in my OSP.
Quantity of animals being transported	
Reason for transport	

Transportation Attestation

- The operations responsible for each of the requirements below are to initial their name in the applicable column:

Requirement	Notes / Applicability	Responsibility of Livestock Owner (Initials)	Responsibility of Transporter (Initials)
Transportation vehicle was thoroughly cleaned prior to loading animals ensuring no risk of contamination e.g., consuming remnants of nonorganic feed.			
All livestock are fit for transport to buyers, auction or slaughter facilities.			
Certified organic livestock are clearly identified as organic, and this identity is made traceable for the duration of transport.			

Requirement	Notes / Applicability	Responsibility of Livestock Owner (Initials)	Responsibility of Transporter (Initials)
Calves have a dry navel cord and are able to stand and walk without human assistance.	<input type="checkbox"/> N/A. Not transporting calves.		
Seriously crippled and non-ambulatory animals are not being transported for sale or slaughter.			
Adequate and season-appropriate ventilation is provided for all livestock trailers, shipping containers, and any other mode of transportation used to protect animals against cold and heat stresses.			
During any transport and prior to slaughter, bedding is provided on trailer floors and in holding pens, as needed, to keep livestock clean, dry, and comfortable. Use of bedding must be appropriate to the species and type of transport.	<input type="checkbox"/> N/A. Poultry crates		
If transport exceeds eight hours, measured from the time all animals are loaded onto a vehicle until the vehicle arrives at its final destination, organic management and animal welfare is maintained in accordance with the livestock operations OSP.	<input type="checkbox"/> N/A. Not transporting for longer than 8 hours.		
Emergency plans are in place that adequately address possible animal welfare problems that might occur during transport (e.g. animal injury, animals escaping, breakdown of vehicle, etc.)			

By signing this Affidavit, I attest to the accuracy of the transportation arrangement described above. I agree to immediately notify the livestock owner and CCOF of any issue or emergency that affects the well-being of animals in transport.

Transportation Service Provider:

I maintain records of all activities that I perform and ensure copies of those records are provided to the certified livestock operations.

Printed Name _____ Signature _____ Date _____

Certified Livestock Operation:

I maintain records of all activities performed by the service provider and have these records available for auditing at my organic inspections.

Printed Name _____ Signature _____ Date _____

The National Organic Standards section 7 CFR 205.201(a) requires that organic livestock must be managed according to an Organic System Plan (OSP), which is agreed upon by the certifying agent.
