

Sample Audit Trail for an Organic Product

You will need to develop an audit trail that is specific to your operation. Consider using documents associated with your procedure for a food safety product recall, if applicable.

This is an example of the type of information you might submit to accompany the H5.0 Audit Trail for Handlers form. This sample audit trail includes an invoice, a batch record, a receiving log, a bill of lading and an inventory record that are linked by lot numbers.

Contents:

A. Outgoing Invoice

The invoice from the organic handler to the buyer shows the lot number of the finished product.

B. Batch Record

The batch record shows both ingredient and finished product lot numbers.

C. Receiving Log

The receiving log shows the ingredient lot numbers.

D. Incoming Bill of Lading

The bill of lading for organic ingredients shipped from the supplier to the organic handler shows the ingredient lot numbers.

E. Inventory

Finally, the inventory record shows on-hand inventory of both ingredients and finished products, and includes their lot numbers. When maintained regularly, it can be used to show that the quantity of organic ingredients you receive supports the quantity of organic product you sell.
